

What is Webcam Modelling?

What is Webcam

Modelling?

So let's start with the basics. Some of you may already have experience within the Adult Entertainment industry, but like us all; we all started somewhere, and we know it can be daunting. I for one (Emily) had no idea what Webcam Modelling even was when I started. I heard of things like Sex Line phone chats and 'Babestation' but didn't really know anything about webcam modelling, what it was or the insane income you can make from it. Delving into this industry is the best thing I have ever done, and I hope it is for you too.

Webcam Modelling is essentially where your role is to entertain clients via a live video link. There are many different ways to entertain your client, nudity is preferred of a webcam model, however, it is **not** essential.

There seems to be a stigma against webcam models that we simply sit there and just get naked. This is not the case. The webcam industry is a safe, secure and fun way for like minded people to meet virtually and have "fun" in any way they feel comfortable.

Here at High Society Models & Co, we pride ourselves on allowing our models to have full control of what they do within their "webcam shows" We would never allow our models to do anything they are uncomfortable with.

If you feel most comfortable in a vest top and trackies and never get naked – Fine! If you feel good in lingerie and want to strip tease because it makes you feel good – Do it!

We have found that our models achieve higher incomes by just being themselves.

As your agents, we are not only here to train you with tips and tricks, we're also here to support you, boost your confidence, help you realise your self-worth, and gain financial independence.
