Different Modes on Direct Cam

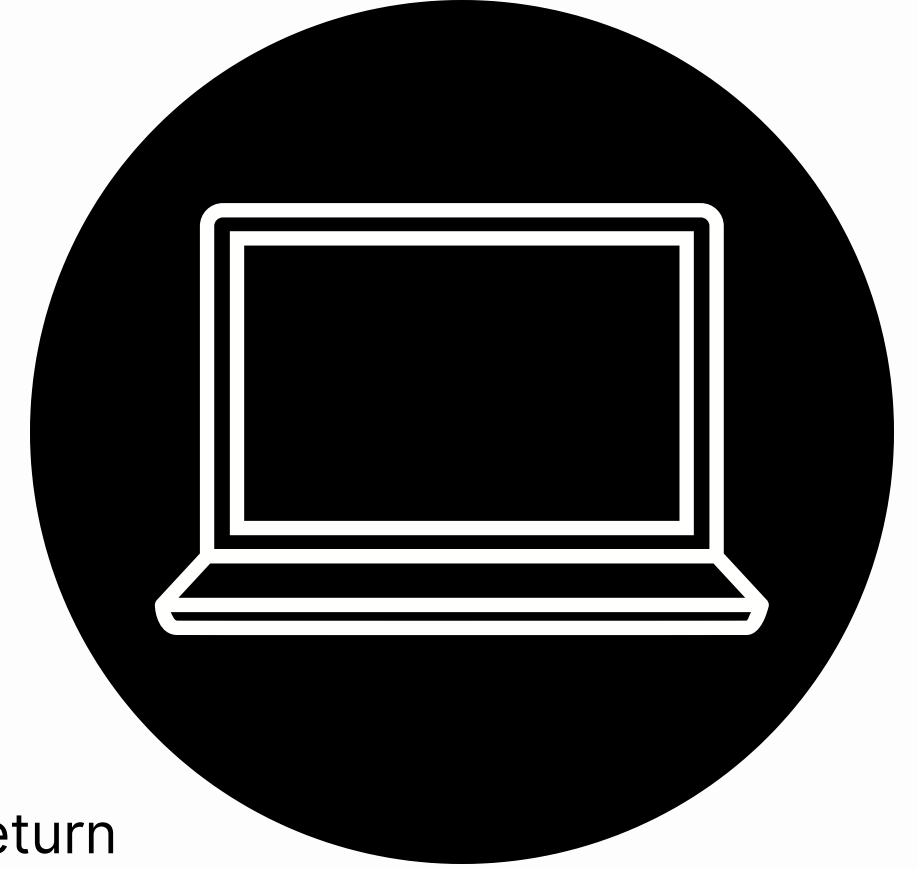

On Direct Cam there are three different types of "Modes"

- Free Mode
- Group Mode
- Private Mode

It is the client who will request to take you into Group and Private mode. Your laptop or phone will ring with a box flashing in the middle for you to accept and answer the paid mode like this:

Free Mode

When you go live for the first time on Direct Cam, you will automatically be in "Free Mode" I will have set your Free Mode to allow a client up to 5 minutes every 15 minutes. So if a client " Enters your room" (goes into your free) they will be able to see you for a 5 minute preview, once the 5 minutes is up they are automatically kicked out of your room. They will then be able to return after 15 minutes. I set it to this so there are not any free loaders who just constantly sit in your free.

Free mode is a chance for clients to see a mini preview of you. It is Adultwork rules that "I will cam & chat for free (clothed, to entice viewers to enter a paid-for mode.)" So you must be clothed. I used to wear my lingerie with a lace dressing gown over the top. Remember - You can wear whatever you want! Whether that's a onesie, or a PVC outfit! Whatever you are comfortable with.

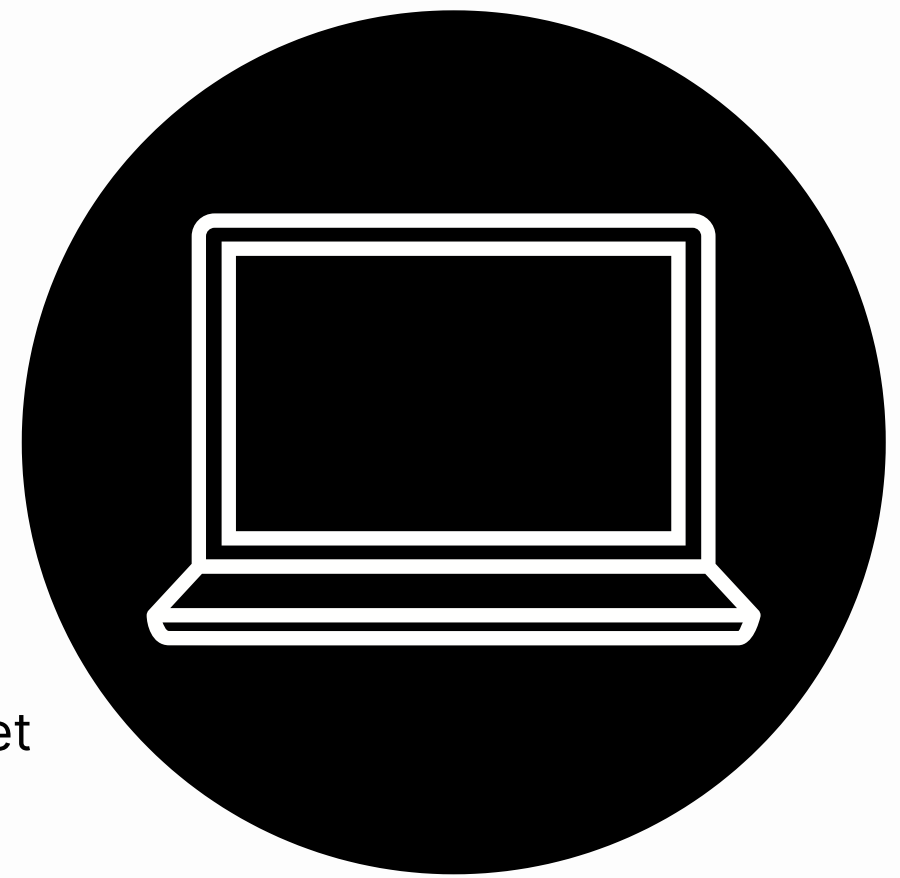

Free mode is your chance to entice clients into taking you into a paid mode. You do not get paid for being in free mode (I wish - We'd all be millionaires! Haha) so it's crucial you entice clients to take you into a group or private mode.

More help on ways to do this later on in training.

We are trying to just give you brief overlook into webcamming, the site and how to use it in this first part of training. There are site navigation videos and extensive training, tips and tricks in other parts of the training site should you need it, along with ongoing support from your Admin Team.

All our group chats host regular "Workshop Calls" where you can get 1-1 help from experienced models.

Group Mode

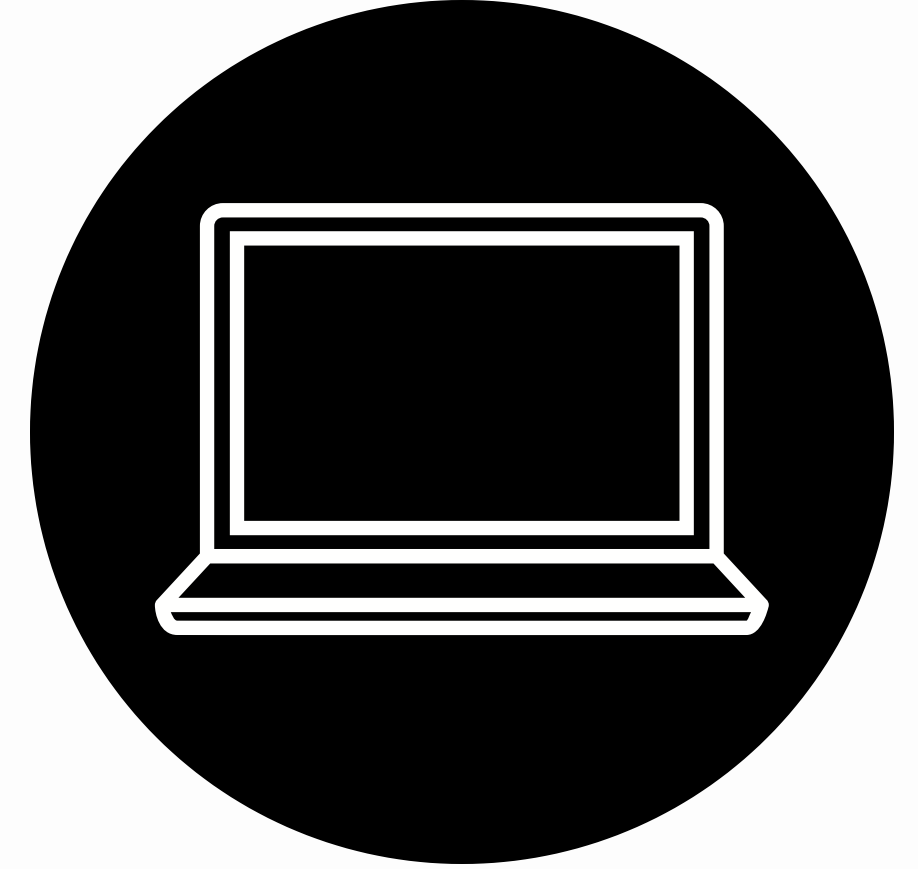

Group mode is where it allows you to have 6 clients in your room at once, whereas private mode is just you and one other client. Group mode price per minute is cheaper, but, if you have 6 clients at once, you will earn more per minute. For example, if your rate is set at 1.29 per minute for a group and 2.29 a minute for a private yet you have 6 clients in your room in group mode you will be making 7.74 credits a minute!

I have personally never been a fan of Group Mode, as I found it was a way for clients to get you one on one for cheaper, and other clients would come in and out. BUT, we have had some models be very successful by hosting games and having several clients in their group at once. Everyone is different.

Side note - It is crucial to remember that everyone is different. Clients all have different types, not everyone likes the same. A client may look at me (Emily) and think I'm the best thing since sliced bread, where as other will think I'm too slim and prefer curvy girls, or red heads etc! There are clients out there for EVERYONE. If a client is coming in and out of your room whether that be in free or group, or you've had a stint of no calls, please do not let it dishearten you. It takes one call to turn it around.

I don't want to contradict myself here, but if you are having a bad day, do not feel obliged to log in - Log off, have a self care day and try again tomorrow. Tomorrow is a new day. With that said, if you can keep going - do! Have a glass of vino, put some bad bitch music on (we have a Boss Ass Bitch playlist on Spotify!) go into free mode, and let those clients stroke your ego! I remember the time I met my biggest regular of all time, I'd been having an awful day, done hardly any credits and was about to log off. Every client that came in was telling me to "cheer up" As I had a face like a slapped ass, I looked grumpy. But I went into free mode, and was taken to private - 4 and a half hours later I'd done my longest webcam call, and from then I made thousands and thousands from the same regular. It sometimes just takes one call to literally change your life.

Private Mode

Private mode is another paid mode. I will set your prices as 1.25 for private mode (Meaning a take home of 68p a minute) So say you had a private webcam call for half an hour it would earn you a take home of £40.80. Considering the minimum wage for over 23's is £9.50 an hour, that's not bad going!! Clients can also tip you, so sometimes, you can earn even more! I've had clients tip me for the use of audio. I never have my audio on in free mode or group mode, I only ever have it on in private mode and that's if they ask... If I'm feeling extra naughty, I'll say "I can put it on but you'll need to tip me first - but trust me, my voice is worth it" and then give them a cheeky smile. Sometimes it works, sometimes it doesn't! It depends on the clients.

It is only you and one client in private mode, no one else can call you when you're in a private mode call.

Private modes have always been my personal favorite as opposed to group, because it gives you a really good chance to build up a genuine relationship and get to know your clients. I've always enjoyed and preferred to get to know my clients and build up a genuine connections, where as some models prefer the quick 5 minute calls. I've always said it's quality over quantity, but some models prefer quantity over quality. It's whatever YOU prefer.

Background Mode

You will see and hear in the group chats a lot of the models referring to being in ' Background Mode' or 'BG' What this means, is that they are not in Free Mode. On your Direct Cam settings, you can set your broadcaster and log in but you are set to only answer paid calls (So group mode and private mode) meaning no Free Mode, you don't have to sit in front of your laptop, phone or tablet constantly.

We always advised when you're new to sit in Free Mode rather than Back Ground mode when you first start. Simply because it's a better way to get your profile out there. Clients use Free Mode to window shop, Back Ground mode is better when you've built up regulars and been added to clients 'Hot Lists' - A Hot List is where a returning client will normally go first, instead of "Online Now" page as then they can see their favorite models in one place and who's online. At the end of every call, it's always best to suggest to a client that they add you to their hotlist.

There is a video on how to go in and out of free mode aka how to go in and out of background mode. You will log in as normal, and your broadcaster will show as "waiting" until your cam rings with a private or group call.

This means you can set your laptop, phone or tablet up in your bedroom for example and crack on with house work, the washing or catching up on some sleep!

Make sure your volume is up so you can hear your cam ringing and run to answer it! We always banter about the "Cam Dash" you hear the ring and peg it to get in front of your cam and pretend to not look out of breath to your client haha.

Depending how much other bits you have to do in background mode, you can either just have it running in the background for regulars, OR you can feature your profile onto the front page of "online now" which means your traffic will be boosted... I'll explain more next...
