

Direct Cam

# *Direct Cam*

This is your 'Live' webcam shows (more information on this later) it appears like below, the client will be able to see you. but you will not be able to see them (unless you request C2C (Cam to cam, and they accept)

Everyone is different whether they choose to use their audio or not. I personally only ever use my audio in "Private" Mode" and even then, only when they ask. I never use audio in free, because frankly, your voice is worth paying for, and in paid modes - It takes longer to type meaning earning more money! Win win!

If you are using your phone or tablet to cam from you may find it easier to use your audio from the get go so that you can prop your phone up somewhere so it is stable and not moving around whilst you text. I would advise getting a tripod / ring light to hold your phone in and a bluetooth key pad when using your phone.

Your phone is an amazing tool when you're in bed and a regular (returning client) wants to chat to you ; It makes them feel as though they are next to you and can sometimes feel more intimate. Every other time I use my laptop. But it's up to you and what you find easiest and beneficial for you!

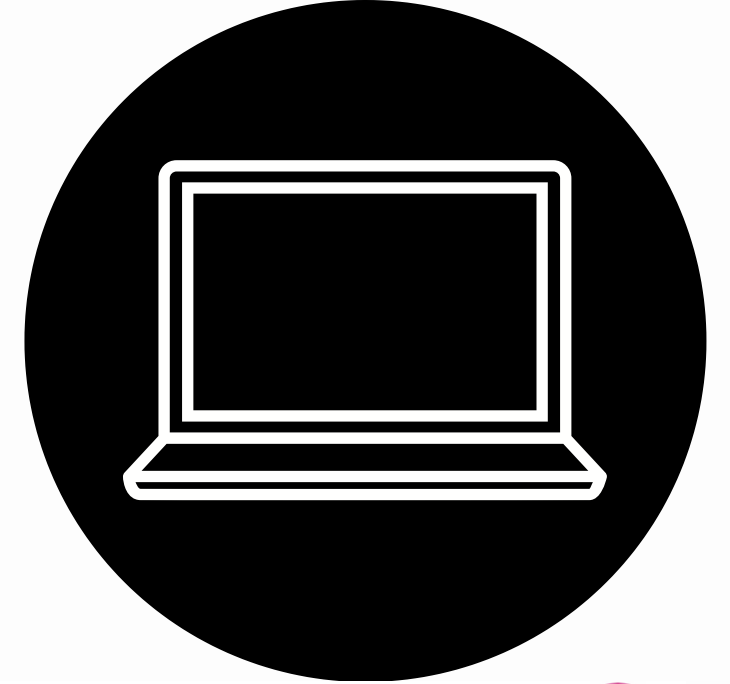

# Direct Cam

This is what it looks like when you first log into Direct Cam. You can see it states "offline" in blue. You will need to click start in order to be shown as online. I always click my mute button, the green microphone to turn my audio.

There is a training video on this, do not worry!

When I first started it was an old coding program that you had to download onto your desktop, but you are very lucky to have an updated, new version that Adultwork brought out last year!

I will now show you what it looks like when you're in "free mode" (I will also go into what the different types of modes are)

# Direct Cam

This is what it looks like when you are logged in, you can see slightly in the corner it says "Free Mode" (slightly cut off)

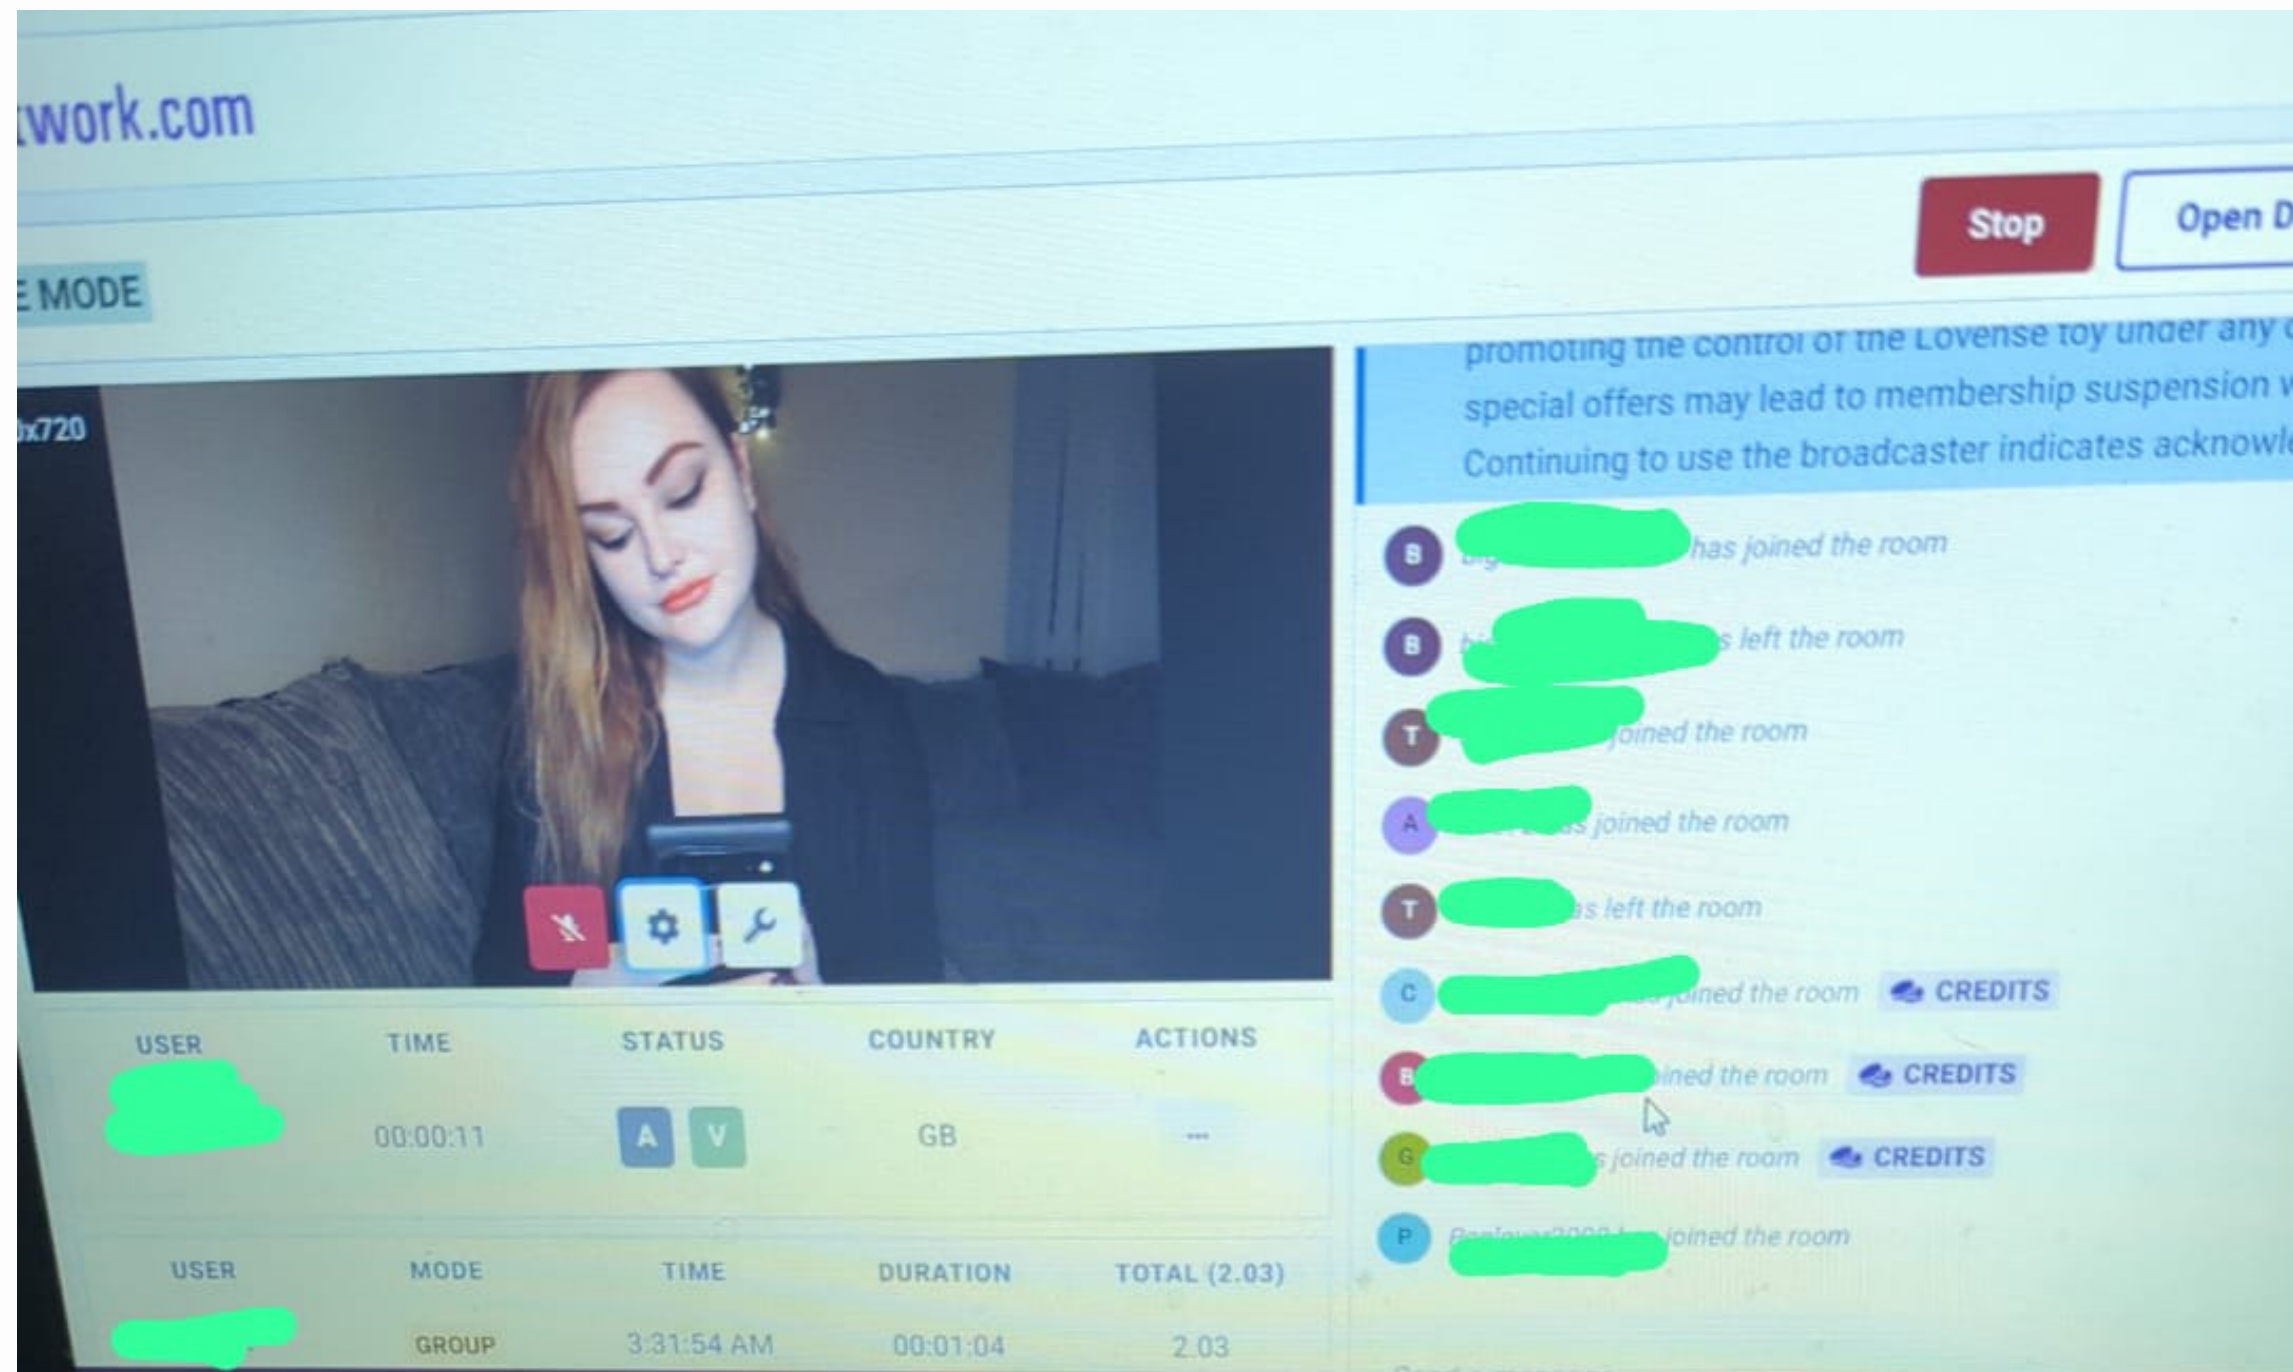

There has been a new update recently where you can now see what clients have credits. It's been amazing for time wasters, you now know that clients have the money to take you to a paid mode (no more bullshitting you! " Oh I don't have any credits to take you private" - yes you do Mr liar! haha)

Again there is a training video on all of this, do not worry!

You can see on the right where the clients are coming in and out of your "room" this is where they will type and talk to you, and you reply.

Do not worry if clients come in and out, they like to window shop! Don't let clients leave dishearten you, it happens to ALL of us!

# Direct Cam

This is what it looks like from the clients side. You can see they have the option to view your free, take you to group or private. They can also view your profile and galleries from here too. So if they have entered your room and are not talking, do not worry - they maybe checking out your profile or gallery.
