

Text-chat only (Direct IM)

Text-chat only, (called
DirectIM) -

This is similar to live webcam shows, but they cannot see you, so it's more of a chat room than anything else. If you remember MSN from back in the day, it's very similar to that. You don't earn as much from this, but it's fab to have logged in if you're unable to get onto webcam. It looks the same as your Direct Cam (from previous page) but your webcam box will not be there or blacked out.
